1 Weekly benefit amount abbreviated in columns as wba.
 2 The fraction of high-quarter wages applies between the minimum and maximum amounts. When State uses a weighted table, approximate fractions are figured at midpoint of brackets between minimum and maximum. When dependents' allowances are provided, the fraction applies to the basic benefit amount. With annual wage formula, fraction is minimum and maximum percentage used in any wage bracket.
 3 When two amounts are given, higher includes dependents' allowances. In the District of Columbia same maximum with or without dependents. Maximum augmented payment to individual with dependents not shown for Massachusetts since highest taxable average weekly wage may be \$281 and any figure presented would be based on an assumed minimum number of dependents.
 4 In all States with dependents' allowances, except Michigan, a claimant receives full allowance for weeks of partial unemployment; in Michigan, was eligible for 1/2 dependents' allowance.
 5 If qualifying wages are concentrated largely or wholly in the high quarter, weekly benefit may be higher than the minimum and weeks of benefits for claimants with minimum qualifying wages are less than weeks of benefits for claimants with minimum weekly benefit amount and minimum qualifying wages; in Alaska, Delaware, Illinois and New Jersey, statutory minimum.
 6 Employers of less than 8 (not subject to the Federal Unemployment Tax Act) outside the corporate limits of a city, village or borough of 10,000 population or more are not liable for contributions.
 7 If the benefit is less than \$8, benefits are paid at the rate of \$8 a week and weeks of duration are accordingly reduced.
 8 No partial benefits paid, but earnings not exceeding the greater of \$7 or 1 day's work of 8 hours are disregarded.
 9 Benefits are paid for each accumulation of 4 "effective days." "Effective day" is defined as the 4th and every subsequent day of total unemployment in a week in which not more than \$84 is paid to the individual. Waiting period is 4 effective days accumulated in 1-4 weeks.
