

### Extended Benefits (EB) Overpayment Detection Measure FY 2013

State level data for the EB overpayment detection measure are very erratic for the fiscal year (FY) 2013 measurement period. Estimated overpayments for this measure are based on the period April 1, 2012 to March 31, 2013, and overpayment recoveries are based on the period October 1, 2012 to September 30, 2013. The six-month lag reflects the period generally required by state Benefit Payment Control activities to identify and establish overpayments for recovery.

Because EB is an episodic program that triggers on and off according to the state's unemployment rate, improved labor market conditions during the period resulted in a sharp decrease in EB program outlays, from just under \$927 million in the April to June 2012 quarter to \$1.2 million in the July to September 2013 quarter (see chart).

These changes in EB program outlays can be even more dramatic at the state level. Therefore, many states reported relatively large EB overpayment recoveries in FY 2013 compared to program outlays during the 12-month period ending March 31, 2013. Many of these established overpayments reflect EB program outlays prior to April 1, 2012.

Additional information on the EB program is available at <http://workforcesecurity.doleta.gov/unemploy/extenben.asp>.

Notes: BPC EB data are for October 2012 - September 2013.

BAM data are for April 2012 - March 2013.

EB amount paid is for April 2012 - March 2013.

^ BAM data estimated due to missing reports.

\* BPC EB data estimated due to missing reports.

# Fraud and nonfraud recoverable overpayments; includes work search, ES registration, and benefit year separation issues; excludes base period wage, base period separation, and oth miscellaneous issues.

+ Overpayments established adjusted for quarters for which EB data were not reported.

Excludes penalties assessed for fraud.

@ Excludes quarters in which insufficient BAM and/or BPC data were reported.
